Comfort for Every Body

Wentworth Care Furniture is a company genuinely passionate about providing the Aged Care industry with furniture and products which offer:

- Dignity and functionality for residents
- Ease of use for site staff
- Value for money for Service Providers and shareholders

Whether your Project is a requirement for a few new beds, replacing dining furniture, or a full fit out, we can offer products to suit your design style and your budget.

We believe that all relationships between ourselves and our Customers and our Suppliers should be viewed as 'Partnerships', where we all work towards a common goal, working together on our strengths and forming meaningful professional relationships.

We have immense experience in large and small projects in all States and have excellent relationships with contractors – who are experts in their field of Delivery and Installation.

We surround ourselves with the best people in their fields throughout the process, to ensure superior service and seamless delivery to our clients.

Wentworth FloorBed

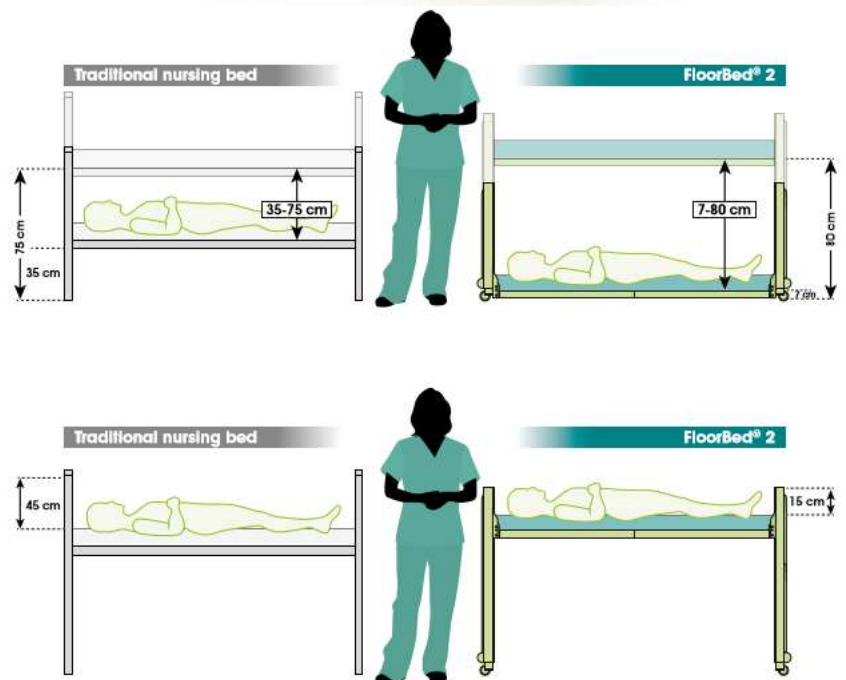

Min Height 71mm

The Wentworth FloorBed at just 7cm from the floor is one of the lowest beds on the Australian market. The Wentworth FloorBed can be customised to suit your own styling.

SPECIFICATIONS AND INCLUSIONS

Lifting Range	70mm – 800mm
SWL	185kg
Back Rest Lift	With Auto-regression
Trendeleburg	And Reverse Trendelenburg
Length 2280mm x Width 940mm Platform: 2000mm x 900mm	

FloorBed raises to 800mm which facilitates an even safer working height for taller carers

The height of the head and foot and footboard when FloorBed is at full height is 110cm

The low head and foot enable access to care tasks such as hair care and lower limb dressing

Low head and foot board will facilitate access to sliding sheets at the head or foot of the bed allowing single carer use to reposition a person up or down the bed

Wentworth FloorBed Features

Width adjustable mattress guides

No trailing wires

Full nursing height

Concealed wheels

Rocker and kneebreak functions

Mattress platform height of just 7.1 cm – similar to a tennis ball

Wentworth FloorBed Accessories

Integrated side rails made of soft material

Head and foot board bumpers reduce impact and minimise the risk of injury

Safety mat, 22 cm high. Provides same height as a FloorBed® with 15 cm foam mattress

Safety sleeve reducing risk of entrapment as the platform mechanism is protected

Bed lever to assist with bed mobility

Rotating bed lever for extra support in movement

Support bar to assist with bed mobility

Easy to transport

Wentworth FloorBed – Style Options

Fully enclosed head and feet are available with or without upholstery.
Tailor the bed to suit your specific requirements.

Bed Maintenance & Audits

Bed Servicing

We can assist you with your bed service schedule and related record keeping, we offer bed servicing packages, using our national network of reputable bed service agents, let us manage this process for you.

Bed Audits

Our bed audit service provides you with a comprehensive report on each of the beds in your facility and where action is required.

Aids and Accessories

We offer a range of aids and accessories to assist with client comfort and mobility.

Overbed Tables

Our Overbed Tables feature a gas lift for easy raising and lowering.

The 'U' base frame ensures it is useful for residents either in bed, or sitting in a chair.

The tops are available in either 22mm or 32mm and can be stained to suit your décor. We can also supply tops in a range of laminate finishes.

Specifications

Minimum Height	740mm	Maximum Height	1020mm
Lift	Gas Lift	Castors	2 Lockable
Height of "U" Base Frame	100mm	Table Top	850mm x 380 mm

Gas Lift for Safety
(not Spring Loaded)

Safety Rails

Horizontal Safety Rails with a universal bed clamping system.

Horizontal rails attach to the metal frame, we recommend only using safety rails with bed head and foot, and not a bedframe.

Safety Rail Covers

Wrap around cover for bed safety rails, with inner foam padding for patient protection.
4-way stretch pressure care waterproof fabric outer
Heavy duty PVC waterproof inner lining
Velcro fastener
Removable and washable cover
Also available in custom sizes

Support Rail

Support rail with universal clamp to suit most hi-lo and lo-lo beds. Designed to reduce the risk of entrapment. Tested and in full compliance with Australian standards.

EvacSafe Evacuation Sheet

The EvacSafe is an under mattress evacuation sheet, a safe and smooth evacuation method for a non-ambulant client. The sheet is fitted to the underside of the mattress and left in place in the event of an emergency evacuation. Designed to safely cocoon the client during evacuation across a floor surface or down a set of stairs. Beds can be made as normal.

Machine washable and highly durable
Length 1980mm, Width 940mm
SWL: 200kg

Mattresses

Wentworth Care offers a wide range of mattresses to suit client needs and budgets. Many of our foam mattresses feature Ultra-Fresh, a proven anti-microbial that inhibits the growth of bacteria, fungi, mould and mildew and preserves hygienic freshness and increases the lifespan of the mattress.

All mattresses feature high quality fully welded covers with a PU coating, which is fire-retardant, anti-bacterial and has been specifically designed for the medical mattress market. Specifications can be altered to suit specific requirements.

Understanding Pressure Redistribution

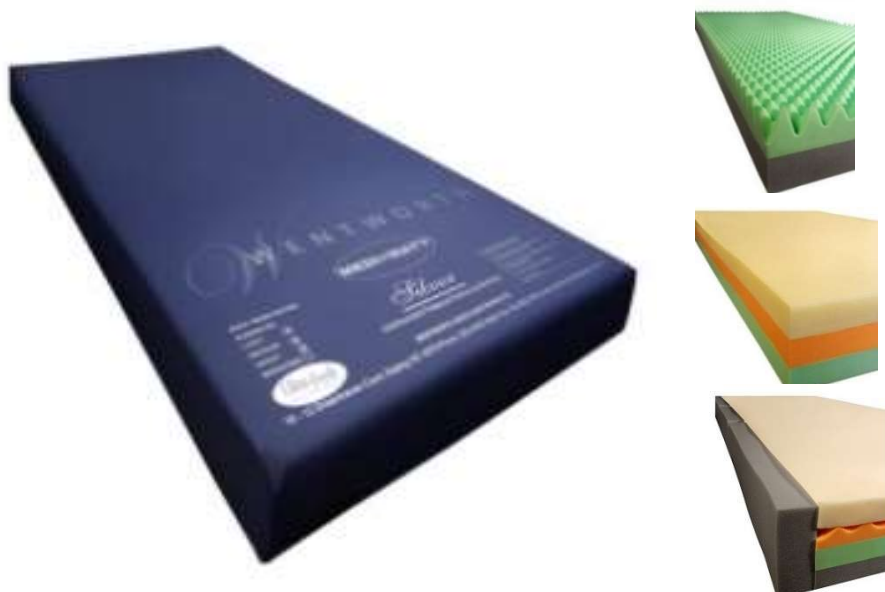

Choosing a good quality support surface for all beds in health care facilities provides the basis of a robust skin integrity and pressure ulcer prevention program. By providing a surface that redistributes pressure by immersion into the foam layers the patient is more comfortable and the surface is more clinically effective.

The basic foam mattress used in the past has been shown to be a contributing factor to the high incidence of pressure ulcer prevalence in both acute and aged care facilities. Choosing a quality high specification (grade) foam mattress replacement is an important feature of your skin integrity program and a proactive way of reducing pressure ulcer risk.

Combined with pressure ulcer risk assessment knowing you have chosen a good quality base mattress for all beds provides much better protection for all 'at risk' patients. Those patients with 'medium to high risk' of developing a pressure ulcer will require a combination of nursing intervention, turning regimes and the allocation of mattresses with greater pressure distribution properties.

What guidelines are available to assist you and guide your choice?

Prior to 2004 there were no standards available to guide the quality of foam used or the covers of this important piece of hospital equipment. Following an extensive investigation of mattress specifications a recommended minimum standard foam mattress with a density-hardness of at least 35-130 foam with a minimum depth of 150mm was presented. This minimum data set has been accepted and used to guide mattress selection and replacement by government authorities.

Mattresses – Foam (Static)

Where extra care is required, we have a range of mattress options to suit the user's needs.

SILVER – Pressure redistributing mattress with Memory Foam

Suitable for Low Risk

Comfort Level: Soft

Single Sided, 3 layer support, including ViscoLux overlay for pressure reduction.

Single: 1970L x 910W x 160H

King Single 1970L x 1070W x 160H

GOLD DELUXE – Pressure redistributing mattress with Memory Foam

Suitable for Low to Moderate Risk

Comfort Level: Soft, with firm edges

Premium pressure reducing mattress, featuring 4 support layers for maximum comfort. Incorporates full length overlay of ViscoFlex and 2nd layer convoluted foam, and side formers for additional stability, with built in hinge profiling.

Single: 1970L x 910W x 160H

King Single 1970L x 1070W x 160H

ViscoFlex

- is a visco-elastic foam which provides very slow recovery cushioning for even pressure distribution and supreme comfort
- Provides ideal comfort without full reliance on the body heat to soften the foam
- Has a very low resilience level that cradles the natural contours in the neck, shoulders and knees

CONCAVE

Concave Deluxe Mattress with Convoluted Top is suitable for Multi Patient Use in Hospital or Community. The convoluted design allows the mattress to profile to any type of mattress base or profiling beds.

Maximum user weight 140kg

Single: 1980L x 880W x 170H

King Single 1980L x 1070W x 170H

Mattresses – Foam (Static)

Where extra care is required, we have a range of mattress options to suit the user's needs

Dyna-Form Mercury

Suitable for High to Very High Risk

SWL 254kg

This mattress specifically designed for users considered to be at High Risk of pressure ulcer development.

Comprising of a specialist castellated cut and blends of the finest quality combustion modified ether foam (CME) this product provides not only the best pressure re-distribution properties, but great patient comfort and product longevity.

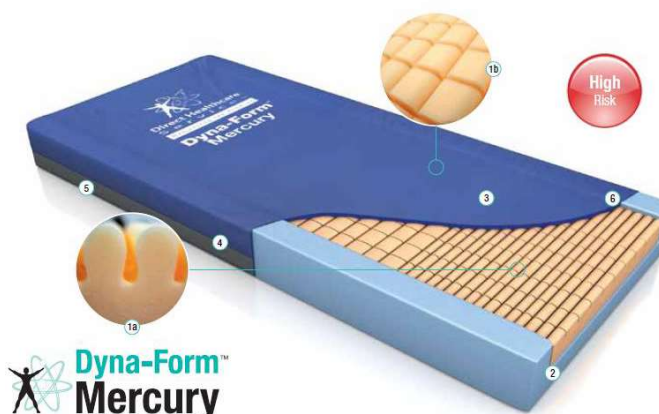

Side wall construction enables primary stability for patient transfer purposes.

Complete with durable, multi stretch, vapour permeable cover and toughened polyurethane base, the Mercury mattress provides an important contribution towards the infection control and tissue viability standards of the aged care or homecare environment.

Pupps Compliant

Single: 1980mm L x 855mm W x 150mm H

King Single: 1980mm L x 1070mm W x 150mm H

Features

Benefits

1a 1b	Castellated foam insert (with tear duct cut)	1a smaller castellated cells for heels and larger cells sacrally
2	Finest quality CME foam base and side walls	Prevents patient bottoming out and aids patient transfer
3	Multi-stretch, vapour permeable fabric (impregnated with an anti fungal agent)	Reduces shear & friction forces, whilst assisting infection control policies
4	Fully high frequency welded cover	Prevents fluid ingress & aids decontamination processes (can be laundered up to 95 °C)
5	Toughened PU / non-slip base	Provides a robust protective surface against hydrolysis / strikethrough
6	Fully replaceable parts	Ensures great value for money

Dyna-Form
Mercury

Mattress Overlays – Air (Active)

Where extra care is required, we have a range of mattress options to suit the user's needs

YORK 4" Alternating Overlay Air Mattress

Suitable for Low to Medium Risk

SWL 115KG.

Suitable for Low to Medium Risk Patients (Waterlow Score 10-15) – Quick release CPR Valve on external side of mattress.

Mattresses – Air & Foam Combination

Where extra care is required, we have a range of mattress options to suit the user's needs

Mercury Advance

Suitable for High to Very High Risk

SWL 254kg

Weight range less than 40 kgs up to 254kg

The Mercury Advance is specifically designed for patients at “Very High Risk” of pressure ulcer development. It combines the benefits of modern foam technology with the facility to “step up” to a dynamic mattress when clinically required.

This makes the Mercury Advance the ideal system to use in a patient's home or palliative care environment as it helps reduce logistic and decontamination costs.

It has a maximum weight capacity of 254kg to accommodate heavier patients.

All component parts are interchangeable and replaceable, maximising product life and reducing environmental impact.

The outer cover comprises a high-frequency welded, multi stretch and vapour permeable fabric which satisfies the strictest infection control policies.

Pupps Compliant

Single: 1980mm L x 855mm W x 150mm H, mattress weight 13.3kg, power unit weight 1.7kg

King Single: 1980mm L x 1070mm W x 150mm H, mattress weight 15kg, power unit weight 1.7kg

Features

- Foam and dynamic mattress combination
- Fixed head section - head / shoulder stability
- Static mode - rapid transfer or cleaning
- Pressure selection mode - patient comfort
- 2-in-1 mattress - minimises logistics and decontamination
- Easy use power unit - automatic pressure adjustment
- LED Alert - flashing indicators for low cell pressures or failure
- CPR connector valve - rapid deflate within 10 seconds
