

Wheelchair Accessible Wicking Planter Boxes

Time spent outdoors in the fresh air boosts mood and well-being, reducing stress and increasing happiness.

Raised garden beds and wheelchair-accessible planter boxes ensure everyone can take part, making it an inclusive and rewarding experience.

Bring back the joy of gardening for your residents

Transform any space into a thriving garden with our versatile and easy-to-use planter boxes. Perfect for gardens, balconies, courtyards, walkways, and more, they bring the beauty of nature to any environment.

Reconnect with Gardening

Our planter boxes make it easy for anyone to get back into gardening, utilising **Smarter, Water-Saving Growing with Wicking Technology**

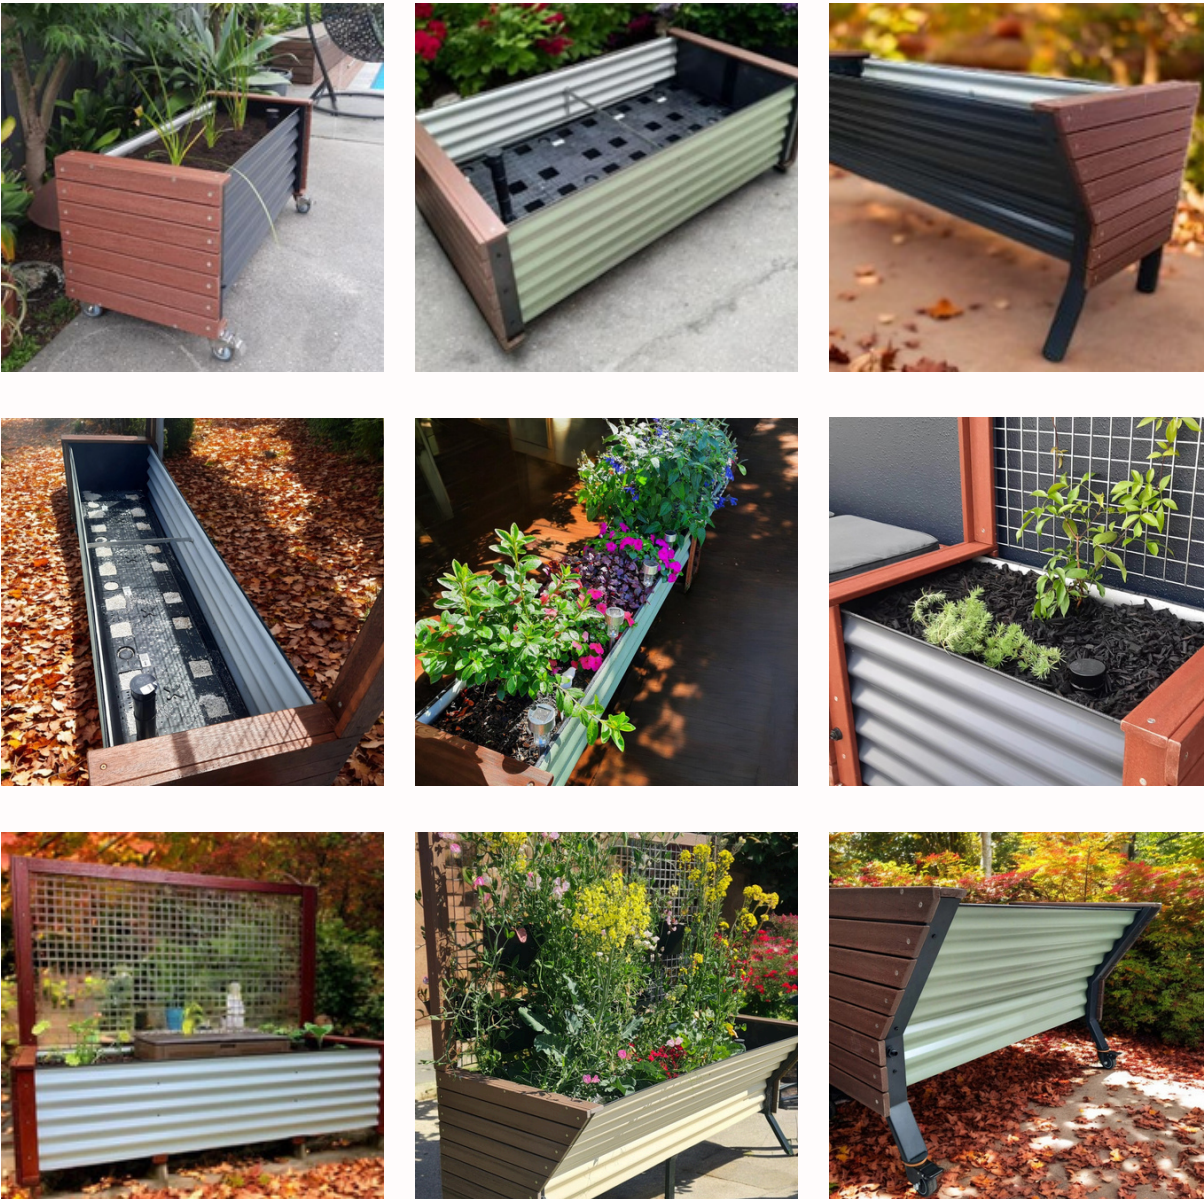

Our Wicking Planter Boxes take gardening to the next level with a built-in self-watering system that:

- Uses 80% less water than traditional watering methods
- Boosts plant growth with up to 30% more yield
- Creates the perfect growing environment by storing rainwater and preventing root rot

Enjoy healthier plants, less maintenance and more time to enjoy gardening

CHOOSE FROM OUR WIDE RANGE

WHAT IS WICKING?

WaterUps wicking is a self-watering technology used in planter boxes that leverages the principle of capillary action, or "wicking," to deliver water directly to plant roots from below. At the base of the planter box is a water reservoir, fitted with WaterUps cells—modular inserts made from recycled plastic designed to hold and distribute water efficiently. The soil rests above these cells, and wicking points draw water upwards as needed, maintaining consistent moisture at the root zone without overwatering. This system reduces water waste, encourages deeper root growth, and helps plants thrive with less frequent watering.

One of the key advantages of using WaterUps in planter boxes—especially in aged care or community gardens—is the ease of maintenance. The reservoir can hold enough water to last weeks depending on weather and plant needs, and a simple overflow and refill point makes it user-friendly. This is especially helpful for environments where residents or volunteers may not be able to water daily. WaterUps wicking beds also promote sustainability by reducing water consumption and preventing runoff, making them an excellent choice for environmentally conscious gardening.
